National Public Works Week  
May 17 - 23, 2026

Public Works professionals focus on infrastructure, facilities and services that are of vital importance to sustainable and resilient communities and to the public health, high quality of life and well-being of the community.

The City of Smithville's Public Works staff is committed to providing excellent City services and maintaining the City's infrastructure. The dedicated professionals of Public Works provide the Community with safe drinking water, treat the Community's wastewater, ensure our streets are well maintained and safe for people to get to work and school, manage and maintain the City's storm sewer system, water distribution and sewer collection system. Their efforts are of vital importance to the Community's quality of life and the well-being of the citizens of Smithville.
